

Aqua

Installation

To install your new theme, double-click the theme icon, titled **Aqua.rwtheme**. Rapidweaver will install the theme and then pop-up a dialog box informing you that the theme is installed and that you now need to quit and restart RapidWeaver.

After exiting and then restarting RapidWeaver you will find your theme installed and ready to use inside the theme drawer.

Upgrades and updates

If you're upgrading from a previous version of a theme you will need to delete your old version before installing the new one. To do so, right-click (or ctrl-click) on the theme in the theme drawer and select delete. After deleting the previous version follow the above steps to install the new version.

* Be warned, deleting your theme will get rid of any data stored in it, such as custom headers, modified code, customized graphics, etc. Be sure to back up the data before deleting your old theme, if necessary.

Good to the last drop

Aqua is a classy RapidWeaver theme, perfect for a portfolio, small business, blog, photo album and much more. This theme packs a ton of options, which makes it quite easy to customize your site with just a few clicks of the mouse.

Backgrounds

Aqua offers a large number professionally designed, stylish background styles.

Included in this theme are 17 graphical backgrounds along with the ability to use the color picker to choose your own solid color.

We also provide Background Overlays for the Aqua theme. This allows you to slightly modify a background, dressing it up, with some overlaid transparent PNG images that we've pre-installed within the theme. Check them out in action in our demo video.

Another feature of Aqua is the ability to lock the background images in place. By enabling this feature in the theme variations you can keep the background from scrolling up as the user scrolls down the page. A great background to use this on for instance might be our wooden background.

Headers

You can either place the site title and slogan above menu (outside of the content area) or within the header area below the menu (within the content area).

The header area is hidden by default. We provide 14 different graphical headers with the theme, as well as 10 blank headers for use with RWMultitool. Our stock headers can also be edited with RWMultitool

For a look at the header in action, see our demo video, or our live preview site.

Sidebar

Aqua includes two sidebar variations. By default the sidebar appears on the right-hand side of the site. The sidebar contains the second level of navigation for your site. For more information on this, see the menu section on this page.

You have the ability to hide the sidebar to give yourself a wider area for your content.

Logo

When using RapidWeaver's logo option, found in the Site Setup, the logo will appear at the top of the sidebar.

Menu

One of the main highlights of the Aqua theme is its beautiful menu bar and its split navigation. It allows users to navigate your site in style.

The main level of navigation is displayed in tabs at the top of the site. Sub menus for these main pages get placed into the sidebar of the site.

Checkout our demo video [here](#) to see how to make sub menus in RapidWeaver and where they appear on your site designed with the Aqua theme.

Content is king

The content area for the Aqua theme is 855 px with the sidebar hidden and is 640 px with the sidebar placed on the right-hand side.

Colors

This theme integrates RapidWeaver's color picker. Using the color picker, you can easily edit the look and feel of your site. All without ever touching any code!

You can edit these parts of the theme with the color picker:

- Site Title
- Site Slogan
- Background
- Content Font
- Sidebar Font
- Sidebar Title
- Sidebar Links
- Links

Fonts

When using RapidWeaver's logo option, found in the Site Setup, the logo will appear at the top of the sidebar.

Aqua allows you to modify the font style for the Site Title, Slogan, Blog Entry Titles, Body Content, and Sidebar Content.

You can choose from the following fonts for these areas:

- Helvetica
- Georgia
- Lucida

A bold version of Helvetica is available for the Site Title, Slogan, and Blog Entry Titles.

Note: Fonts display differently across different operating systems and browsers. Compatible fonts have been chosen for other browsers. For instance, in Windows your users will see Verdana instead of Lucida. This is due to the fact that Verdana is a very similar font that is available on Windows, and Lucida is not.

Support

You can find help if you need it by going to www.elixirgraphics.com/helpdesk where you will find a Frequently Asked Questions page, tutorial videos, a link to the RapidWeaver support forums and our contact form.

Technical support

Elixir's themes are provided "as is" without warranty above and beyond updates, bug fixes or repairs. You may alter the appearance of the theme or its graphics, but only for your personal use. Any modifications are at the sole risk of the user and elixir graphics does not guarantee the performance of any package which has been altered or modified. We also can not provide support for modified themes or graphics. You are responsible for adding or editing your website's content. Technical support will be limited to problems specifically associated with unaltered themes in normal conditions. We do not have the resources to offer free Rapidweaver technical support or to provide training on how to use Rapidweaver. A complete Rapidweaver user manual can be located [here](#), and the Rapidweaver forums are a great resource for all sorts of Rapidweaver questions. We do offer support relating to our products and encourage you to report any bugs or problems you have with one of them as well as we welcome any questions you may have about one of our products.

Image usage

Images, photos, and graphics may not be used anywhere other than in sites developed which are related to the theme(s) you have purchased from elixir.

Plug-in compatibility

Our themes work with a variety of third-party Rapidweaver plug-ins. While the themes work with these plug-ins we can not and do not offer technical support for these plug-ins and their use in developing your site.

Browser compatibility

We have tested our products in the latest versions of Safari, IE6, IE7, and Firefox but make no warranties that their performance will be identical in all browsers. The user experience will be such that any difference will hopefully go unnoticed. Please understand that some technologies are beyond our control.

Restrictions

Our themes, style sheets, and images may not be resold, distributed, or added to any type of collection. They may not be offered for download or use from any website nor placed online for promotional purposes. Each template must be used as supplied for its original intended purpose. This simply means you may not select images or code from the themes or style sheets to add to another application.

Modifications and customizations

We do not provide support for making modifications or customizations to themes. We also do not offer support for themes which have been modified or for coding of which you have added to your project either internally to the theme or through RapidWeaver itself.
