

## Installation

To install your new theme, double-click the theme icon, titled **float.rwtheme**. Rapidweaver will install the theme and then pop-up a dialog box informing you that the theme is installed and that you now need to quit and restart RapidWeaver.

After exiting and then restarting RapidWeaver you will find your theme installed and ready to use inside the theme drawer.

## Upgrades and updates

If you're upgrading from a previous version of a theme you will need to delete your old version before installing the new one. To do so, right-click (or ctrl-click) on the theme in the theme drawer and select delete. After deleting the previous version follow the above steps to install the new version.

\* Be warned, deleting your theme will get rid of any data stored in it, such as custom headers, modified code, customized graphics, etc. Be sure to back up the data before deleting your old theme, if necessary.

# Beautiful and fluffy

Float is a light, airy design that offers you a classy choice for designing your website. This Rapid-Weaver theme packs a lot of options. It is a theme that is perfect for creating a website for a small business, portfolio, blog, photo album and more.

## Backgrounds

Float offers a huge number professionally designed, stylish background styles. The backgrounds included in this theme serve as both a header and a site background.

Included in Float are 27 graphical backgrounds along with the ability to use the color picker to choose your own solid color. Or, simply hide the background altogether.

View the live preview site to get an idea of the high quality, background images and watch our demo video to see all of the included backgrounds.

## Sidebar

Float includes seven sidebar variations. Not only can you place your sidebar on the left or the right, but you can also choose to locate it at the bottom of the site, just above the footer.

In addition to normal sidebar styles you can choose to dress up the sidebar as well. We offer an option for a 3D inset look on either the left or the right, as well as a talk-bubble-esque look for the sidebar at the bottom. Check out our demo video or live preview site to get a look at all of these options.

## Content is king

The content area for the Candy theme is 850px with the sidebar hidden and is 600 px with the sidebar placed on either the right- or left-hand side.

## Find it... in style

Float incorporates a very stylish search feature into its menu bar. When a visitor to your site clicks the magnifying glass located on the right-hand side of the menu bar a search field will float up and allow them to use Google to search your site.

To use the site-wide search you will need to be sure that your site's base URL is set up in the Site Setup pane. Without doing so, the search feature will not work.

Also note that the search feature uses Google to search your site. Your site must be indexed by Google for this search to return any results.

This feature can be toggled on and off on a page-by-page basis.

# Aa Font selection

The site navigation, or menu, is not the only place you can change the font type and size in the Float theme. Float allows you to modify the font style for the Site Title, Slogan, Content Type, Sidebar, Blog Entry Title, and of course the Menu items. You're also able to modify the font size for the Content Area, Sidebar, Menu, and the Input Fields of the Contact Form.

## Page title

Float allows you to display the Page Title between the site menu and the content area. This can be toggled on and off on a page-by-page basis.

## Colors

This theme integrates RapidWeaver's color picker. Using the color picker, you can easily edit the look and feel of your site. All without ever touching any code!

You can edit these parts of the theme with the color picker:

- Body Font
- Site Background
- Menu Text
- Sub Menu Text
- Links
- Sidebar Font
- Sidebar Title
- Site Title
- Site Slogan
- Page Title
- Blog Entry Titles
- Form Input Field Backgrounds Menu

## Menu

One of the main highlights of the Float theme is its beautiful floating menu bar. It allows users to navigate your site in style. In setting up your site with RapidWeaver, and our Float theme, you have a wide variety of options available to you.

Float allows you to:

- Change the font style and size
- Modify the background of the selected items
- Change the division lines between menu items

Float offers four fonts to choose from in the menu. It also gives you the option of three font sizes.

When changing the current selected item's appearance you have eight different options.

We've also provided five different menu divider lines to choose from.

# Support

You can find help if you need it by going to [www.elixirgraphics.com/helpdesk](http://www.elixirgraphics.com/helpdesk) where you will find a Frequently Asked Questions page, tutorial videos, a link to the RapidWeaver support forums and our contact form.

## Technical support

Elixir's themes are provided "as is" without warranty above and beyond updates, bug fixes or repairs. You may alter the appearance of the theme or its graphics, but only for your personal use. Any modifications are at the sole risk of the user and elixir graphics does not guarantee the performance of any package which has been altered or modified. We also can not provide support for modified themes or graphics. You are responsible for adding or editing your website's content. Technical support will be limited to problems specifically associated with unaltered themes in normal conditions. We do not have the resources to offer free Rapidweaver technical support or to provide training on how to use Rapidweaver. A complete Rapidweaver user manual can be located [here](#), and the Rapidweaver forums are a great resource for all sorts of Rapidweaver questions. We do offer support relating to our products and encourage you to report any bugs or problems you have with one of them as well as we welcome any questions you may have about one of our products.

## Image usage

Images, photos, and graphics may not be used anywhere other than in sites developed which are related to the theme(s) you have purchased from elixir.

## Plug-in compatibility

Our themes work with a variety of third-party Rapidweaver plug-ins. While the themes work with these plug-ins we can not and do not offer technical support for these plug-ins and their use in developing your site.

## Browser compatibility

We have tested our products in the latest versions of Safari, IE6, IE7, and Firefox but make no warranties that their performance will be identical in all browsers. The user experience will be such that any difference will hopefully go unnoticed. Please understand that some technologies are beyond our control.

## Restrictions

Our themes, style sheets, and images may not be resold, distributed, or added to any type of collection. They may not be offered for download or use from any website nor placed online for promotional purposes. Each template must be used as supplied for its original intended purpose. This simply means you may not select images or code from the themes or style sheets to add to another application.

## Modifications and customizations

We do not provide support for making modifications or customizations to themes. We also do not offer support for themes which have been modified or for coding of which you have added to your project either internally to the theme or through RapidWeaver itself.
